Summary

PORTFOLIO: <https://lenn0n.github.io>

Hi! I'm Lennon! I started my coding journey in Wapka.mobi way back 2011 after I graduated in Highschool. I've spent my time learning basics in HTML and CSS for 4 years and finally decided to go to College.

In 2016, I graduated in Associate in Computer Technology with Distinction and continued my journey in BS Information Technology. It's been a long battle and fun experiences meeting different people's way of thinking. Finally, Year 2020, I finished my study and got a degree.

3 months later, I got hired as Web Developer. My first job as Front-End Developer.

Here are my forte:

- Javascript
- Typescript

Framework and Libraries

- VueJS
- ReactJS
- Bootstrap
- NextJS
- TailwindCSS

I have a deep understanding in state management like Redux and Vuex. I also configure Webpack and uses Express to serve my static build files.

I have also strong fundamentals in Dockerizing apps, Kubernetes, GIT, Basic Linux, Shell.

I'm also knowledgeable in:

- Cloud Functions
- Firebase Firestore
- Android Studio
- mySQL and noSQL
- Rest API
- Photoshop
- AutoCAD

I wish to grow and leave my comfort zone. I want to learn Back-End Development. I would be glad if you hire me as your Frontend Developer and also giving me some work for Back-End Devs. :)

Experience

Frontend Developer

OLE Elite Software Philippines

Sep 2020 - Present (3 years 5 months)

Education

Cavite State University

Bachelor of Science in Information Technology

Jun 2015 - Jun 2020

Skills

Webpack • Kubernetes • Multi-level Marketing • Tailwind CSS • Kubectl • Web Development •
Redux.js • Docker • HTML • Vue.js
