Summary

PORTFOLIO: <https://lenn0n.github.io>

Hi! I'm Lennon! I started my coding journey in Wapka.mobi way back 2011 after I graduated in Highschool. I've spent my time learning basics in HTML and CSS for 4 years and finally decided to go to College.

In 2016, I graduated in Associate in Computer Technology with Distinction and continued my journey in BS Information Technology. It's been a long battle and fun experiences meeting different people's way of thinking. Finally, Year 2020, I finished my study and got a degree.

3 months later, I got hired as Web Developer. My first job as Front-End Developer.

How I write my code:

- JavaScript
- TypeScript

Framework/Libraries/Tools I used:

- SequelizeJS
- VueJS
- ReactJS
- Bootstrap
- NextJS
- TailwindCSS
- Webpack
- Redux Toolkit
- ExpressJS
- GIT

I have a deep understanding in state management like Redux and Vuex. I also configure Webpack and uses Express to serve my static build files.

I have also strong fundamentals in Dockerizing apps, Kubernetes such as Deployments, Services, Pods, Ingress and so on.

I'm also knowledgeable in:

- Building Rest APIs
- SQL Associations
- Cloud Functions (Firebase)
- Android Studio (My Thesis)
- Photoshop
- AutoCAD

Experience

Frontend Developer

OLE Elite Software Philippines

Sep 2020 - Present (3 years 6 months)

Education

Cavite State University

Bachelor of Science in Information Technology

Jun 2015 - Jun 2020

Skills

Webpack • Kubernetes • Tailwind CSS • Web Development • Redux.js • Docker • Vue.js •
React.js • Sequelize.js • Node.js
